

Vision Statement

Promoting “Make in Pakistan” and operating as a strong business support organization towards a bright and prosperous future where majority required automotive parts are efficiently produced in the country with highest standards of quality by deploying leading-edge technology, pioneering engineering methods and modern management systems while respecting our environment – making Pakistan a force to be reckoned with.

Mission Statement

PAAPAM's mission is to support its members build competitive businesses by promoting their interests to policy-makers in the government and other stakeholders; furthering local and export business development opportunities and strengthening partnerships; and enhancing their engineering and managerial capabilities through quality programs, technical guidance, trainings and seminars, and sharing of information.
